Public Health Department,
Town Hall,
Leigh.

To the Chairman and Members of the Health Committee.

I have the honour to present for your information and consideration the Annual report on the health of the Borough of Leigh for the year 1955.

The health of the Borough has remained satisfactory through the year. The population continued its downward trend which had been evident since 1950, the mid-year estimate being 47,910. The birth rate at 14.4 per thousand showed a decrease on the previous year. The infantile mortality rate at 41 showed a rather startling rise from the previous recent years.

The death rate 14.5 per thousand continues its upward swing. Reference to the table of classification of causes of death reveals a most welcome reduction on those dying from tuberculosis - 5, the outstanding susceptibility of the male to cancer of the lung bronchus - 11 males 0 females, to angina - 43 males 25 females and to other respiratory diseases - 41 males 19 females. A most pleasing trend to note is, that parallel with the decrease in the mortality of tuberculosis there is also at least a suggestion of a decrease in its morbidity as in the past two years the notifications of pulmonary tuberculosis have been 18 and 19.

The general work of the Department unfortunately continues to suffer from staffing difficulties and little more than emergency tasks could be satisfactorily accomplished. The opportunities for really constructive effort must continue to wait for the morrow.

I welcome this opportunity of expressing my thanks to the Chairman and Members of the Health Committee for their continued interest in the Department and to the members of the staff and my colleagues in the Town Hall for their ever ready help and co-operation.

Yours sincerely,

E. TAYLOR.

VITAL STATISTICS

The following is a summary of the principal statistics for the year 1955.

Population	47,910
Number of Deaths (corrected)	604
Death Rate (per 1,000 population)	14.5
Deaths of Infants under one year	29
Infantile Mortality Rate (per 1,000 registered live births)	41
Number of Live Births registered (corrected)	702
Birth Rate (per 1,000 population)	14.4
Number of Still Births (corrected)	23
Still Birth Rate (per 1,000 total births)	32
Number of Illegitimate Births	20
Illegitimate Birth Rate (per 1,000 total births)	27.58
Maternal Deaths	1
Maternal Mortality Rate (per 1,000 Live Births)	1.42
Maternal Mortality Rate (per 1,000 Live and Still Births)	1.38
Number of Deaths from Pulmonary Tuberculosis	5
Death Rate per 1,000 population from Pulmonary Tuberculosis	0.10
Number of Deaths from all forms of Tuberculosis	5
Death Rate per 1,000 population from all forms of Tuberculosis	0.10

Leigh is an industrial South East Lancashire town. The highest and lowest ordnance datum being 146 feet and 53 feet respectively.

The principal industries are coal mining, cotton spinning and weaving, electric cable manufacture, rope making, rayon weaving, sheet metal working, agricultural and general engineering with some farming on mossland on the Southerly boundary of the Borough.

Area in acres	6,359
Population (Census 1951)	48,728
Estimated population (Mid-year estimate 1955)	47,910
Number of Inhabited houses end of 1955 according to rate books	14,363
Rateable Value	£276,710
Sum represented by Penny Rate	£1,060

Year 1954	14.9	11.8	0.23	2.72	27
Year 1955	14.7	12.6	0.10	1.38	41
Increase or decrease in 1955 on 5 years average (1950 — 1954)	-0.3	+1.0	-0.10	-0.75	+16
Increase or decrease in 1955 on 1954	-0.2	+0.8	-0.13	-1.34	+14

BIRTH RATE

The total number of registered live births assignable to the Borough of Leigh for the year 1955 was 702 compared with 714 the previous year. The corresponding Birth Rate for the two years respectively are 14.9 and 14.7 per 1,000 estimated population.

The following table gives the Birth Rate for Leigh and England and Wales during the last 25 years:-

	Leigh	England & Wales
1931	15.7	15.8
2	14.8	15.3
3	14.5	14.4
4	14.0	14.8
5	13.6	14.7
6	12.8	14.8
7	13.5	14.9
8	15.3	15.1
9	14.5	15.0
40	15.5	14.6
1	18.1	14.2
2	18.3	15.8
3	19.8	16.5
4	19.3	17.6
5	18.8	16.1
6	20.4	19.1
7	22.2	20.5
8	17.9	17.9
9	17.4	16.7
50	16.5	15.8
1	14.7	15.5
2	13.9	15.3
3	15.1	15.5
4	14.9	15.2
5	14.4 (adjusted)	15.0

STILL BIRTH RATE

The total number of registered still births assignable to the Borough during the year was 23 as compared with 20 in the previous year. Giving rates for the two years of 0.48 and 0.41 respectively per 1,000 estimated population. The still birth rate for England and Wales during the period was 0.35.

SECTION C

PREVENTION OF AND CONTROL

OVER INFECTIOUS AND

OTHER DISEASES

PREVENTION OF AND CONTROL OVER INFECTIOUS AND
OTHER DISEASES

CHICKENPOX (VARICELLA)

This disease is not notifiable in the district.

DIPHTHERIA

3 suspected cases were notified but the disease was not confirmed. The need to continue the immunisation campaign against the disease remains the most necessary pre-requisite for continued freedom.

DYSENTERY

31 notifications were received during the year.

ENCEPHALITIS

Again no cases were notified.

ERYSIPELAS

5 cases have been reported.

FOOD POISONING

4 cases were reported during the year under the provisions of Section 17 of the Food and Drugs Act.

MALARIA

No cases reported.

MEASLES

The periodicity of this infection was experienced with 418 cases. All proved to be fairly mild and complications were minimal.

MENINGOCOCCAL INFECTION

Although 4 cases were notified, three were confirmed as Meningitis and 1 as Poliomyelitis.

MUMPS (INFECTIVE PAROTITIS)

This disease is not notifiable but it is known that a number of cases occurred.

PARATYPHOID FEVER

No cases reported.

PNEUMONIA

9 cases occurred this year.

POLIO MYELITIS (INFANTILE PARALYSIS)

1 case notified as Meningitis was later confirmed as Poliomyelitis.

PUERPERAL PYREXIA

No case was notified.

SCARLET FEVER

The incidence remained comparable with last year, there being 33 cases notified.

SMALLPOX (VARIOLA)

No case occurred but if this satisfactory state of affairs is to be maintained it is imperative that the public continue to seek protection through vaccination and that a higher acceptance rate is achieved.

TUBERCULOSIS

During the year there were 19 new cases of respiratory and 1 of non-respiratory infection, as compared with 18 and 5 respectively the previous year.

TYPHOID FEVER

No case occurred.

VENEREAL DISEASE

None of the venereal diseases are notifiable.

WHOOPING COUGH

There were 21 notifications during the year.

Part	6	Inspection and Supervision of Food	Page	54
Page	7	Rodent Control	Page	63

GENERAL SANITARY ADMINISTRATION

In this section of the Annual Report last year attention was drawn to the difficulties caused by the shortage of sanitary inspectors in the department and unfortunately it is necessary to draw attention similarly this year. We were one half short of establishment up to April when an additional Inspector was recruited so that for the remainder of the year the department functioned with one third deficiency. This has been reflected departmentally in that the total number of visits to premises of all types was down to 4618 as against 7489 in 1954 and 9292 in 1953. It is readily apparent that with a trend of yearly diminishing totals of this magnitude, much of the work of the department regrettably has had to receive only a minor degree of the attention it should receive.

The emphasis this year has been on Slum Clearance work. By virtue of the Housing Repairs and Rents Act, 1954, the Ministry of Housing and Local Government called for the submission of proposals for dealing in one way or another with unfit houses in the form of a return stating the period in which it was thought necessary for securing the demolition of all such houses and the number to be dealt with in the first five years, a copy of which appears on page 48. Following the submission of the proposals, representations were made with respect to certain houses particulars of which are shown on page 49.

During the year the Sanitary Inspectors paid a total of 4618 visits to all classes of premises as against 7489 in 1954.

COMPLAINTS RECEIVED AND INVESTIGATED.

The number of complaints received and investigated in the year by the staff was 873.

These complaints are classified in the following table:-

Defective drains	113
" closet	123
" door	6
" window frame	11
" yard surface	2
" eavesgutters	19
" house roof	35
" floor	13
" sink	5
" wall & ceiling plaster	20

INFECTIOUS DISEASES — INVESTIGATION AND DISINFECTION.

70 visits of investigation and 49 re-visits were paid to premises where infectious diseases had occurred. In addition 45 visits were made by the Disinfecting Staff for the purpose of carrying out disinfection on account of the occurrence of notifiable diseases. 24 library books and eighteen beds were disinfected.

Sales of Disinfectant by the Department realised £178. 15s. 4d.

DISINFESTATION.

30 visits were made by the Sanitary Inspectors in the course of investigation of verminous premises.

A total of 47 premises were treated by the disinfestation staff as follows:-

Houses	19
Food Premises	16
Offices & Workshops	3
Other Premises	9

The department provides a complete disinfestation service. This service is being increasingly used, particularly by the food trade, and is available to the public both for treatment and advice on any infestation problem. For this class of work £65. 16s. 0d. was recovered during the year.

TESTING OF DRAINAGE SYSTEMS

58 visits were paid for the purpose of testing and inspecting drainage systems.

Testing of new drainage is carried out by the Borough Surveyor's Department

CLOSET ACCOMMODATION

Number of fresh water closets	16,888
Number of waste water closets	244 (approx)
Number of trough closets	8 (schools)
Number of pail closets	23
Privy middens	17

During the year 16 waste water closets were converted into pedestal water closets. A sum of £8 or one half of the cost of conversion whichever is the less, is paid to the owner on completion of the work.

The pail closets and privy middens are situated in the semi-rural area of the Borough where it is impracticable to provide water closets.

SEWERAGE DISPOSAL

The disposal is effected at the works of the Leigh and Atherton Joint Sewerage Board, Mather Lane, Leigh. The method of disposal is by percolating fliters and humus tanks, with additional chemical treatment by chlorine gas.

HOUSES LET IN LODGINGS

There are three houses on the register.

CANAL BOATS

There were no new registrations of Canal Boats during the year.

I inspection was made, the object being to ensure compliance with the requirements of the Public Health Act, 1936. No infringements were found.

There were no cases of Infectious diseases reported on any Canal Boat and it was not necessary to detain any boat for cleansing or disinfection.

PIGGERIES

The number of piggeries in the Borough is estimated to be 105

27 visits were made during the year.

OFFENSIVE TRADES

There are two tripe-dressers and one fat melter within the Borough. A good standard is maintained.

COMMON LODGING HOUSES

There are no common lodging houses within the Borough.

MARINE STORE DEALERS

There are seven premises registered as Old Metal and Marine Store Dealers in the Borough. In all cases of new registration the Police are informed.

PUBLIC BATHS

The Public Baths consists of 2 plunges, 12 slipper baths and 1 foam bath. Facilities are available for Turkish baths.

Forty-three samples of swimming bath water were submitted to the Public Health Laboratory for examination.

RAG FLOCK AND OTHER FILLING MATERIALS ACT, 1951

There is one factory on the register. This was inspected during the year and found to be satisfactory.

Three samples of filling materials were submitted to an approved analyst and found to conform to the Regulations and the B.S.I. 1425 standard. The results being as follows:-

Rag Flock:-	Soluble impurities:-	Average	1.7%
	Chlorine in the form of Soluble Chloride	18 p.p.	100,000
	Oil and Soap	3.7%	
Cotton Felt Wadding:-	Trash:-	Average	4.6%
	Oil		0.7%
	Dust Index	Average	1.7
Algerian Fibre:-	Insoluble impurities	Average	1.4%

MORTUARY

The Public Mortuary is supervised by the Department, the two disinfectors acting as attendants.

During the year 87 bodies were received for the following causes:-

Accidents-	18
Suicide	6
Natural Causes	63

REFUSE COLLECTION

This service is under the control of the Director of Cleansing who has supplied the following information:-

Number of moveable ashbins	18,000
Number of ashbins emptied	846,000
Refuse dealt with at Destructor	310 tons
Refuse delivered to Tlp	21,566 tons

PLACES OF PUBLIC ENTERTAINMENT

There are seven cinemas of which one is used for live shows occasionally.

Two visits were paid in the year to this class of premises for the purpose of inspection of sanitary accommodation, ventilation and cleanliness.

SHOPS ACT, 1950

It is estimated that there are more than 900 shops in the Borough.

A total of 12 visits for all purposes were made during the year.

One informal notice was served under Section 38 of the Act requiring the provision of suitable and sufficient washing facilities.

WATER SUPPLY.

The supply is taken in bulk from the Rivington reservoirs of the Liverpool Corporation, being sand filtered and chlorinated before distribution in the Borough.

Arrangements are also made with Manchester Corporation for a supply to be made available from the Thirlmere aqueduct.

Weekly sampling of the Town's Mains Water is undertaken for bacteriological examination. In all a total of 86 samples were submitted. 35 by this department and 51 by the Supplying Authority.

Two samples were taken for chemical analysis. The table on page 37 shows the results.

Number of houses with direct supply from the main	14,439
---	--------

Number of houses supplied by standpipe	1
--	---

Number of houses with private supply	7
--------------------------------------	---

MEANS OF ESCAPE IN CASE OF FIRE

Reports and recommendations with respect of work under this Section of the Act are made to the Watch, Parks and Cemeteries Committee of the Council.

The importance of this field of administration has been brought to the public eye as a result of recent publicity given by the press to one serious fire which occurred. Inspections of this nature demand the attention of experienced staff who are capable of making a keen appraisal of the risks involved, having regard to the variance in type and structure of Factories, and the processes carried on therein.

During the year five visits were made to premises which were not provided with suitable means of escape in case of fire. Of these visits four were made in connection with work which was continuing from the preceeding year. As a result of these visits Certificates of Suitability were issued in respect of four factories. Details of the work required and completed prior to the issue of the Certificates are given below:-

1. One new external steel staircase with doors and landings serving three floors to ground level.
2. Modifications to door and door fastenings.
3. Removal of obstructions to exits.
4. Marking of exits in accordance with the Act.

SMOKE ABATEMENT AND ATMOSPHERIC POLLUTION

Continued representation has been made during the year to the National Coal Board regarding the emission of smoke from Parsonage Colliery, and it is pleasing to report that some progress has been achieved.

A photo-electric apparatus has been fitted in the main flue, this has the effect of setting off an alarm when black smoke is being emitted and so warning the stokers. A Smoke Density Recorder has also been installed, this indicates and records the density of smoke emitted. This record is permanent and can be used by the National Coal Board to check against complaints. A more selective policy has been adopted towards the type of fuel being used and an appeal made to the men for more co-operation in the methods of stoking.

Smoke from the Locomotives of the National Coal Board has during the year given rise to many complaints and as a result of negotiations with the Board two new Locomotives have been purchased at a cost of £20,000 and are now in service as replacements.

The number of factory and works chimneys situated within the Borough is 74.

The local Bye-law relating to emission of black smoke permits a maximum of two minutes in one half hour.

The following table gives details of the work done in this connection during the year:-

Number of chimneys observed (half hour observations)	8
Number of observations showing emission of black smoke in excess of Bye-laws limits	3
Number of Intimation notices served	2
Number of abatement notices served	1

An average emission of 3.37 minutes of black smoke per half hour was recorded.

This authority is a member of both the North Western Division of the National Smoke Abatement Society and the Manchester and District Regional Smoke Abatement Committee.

It is again necessary to have to report that little has been done with respect to Smoke Abatement, the continued frequency of staff changes and deficiencies make it impossible to give the attention to this work that its importance merits. The amount of Solid Matter deposited per sq. Mile, as given in the tables on pages 42, 43 and 44 shows positive evidence of the necessity for sustained vigilance.

The recording of the extent of atmospheric pollution has continued during the year.

The apparatus in use consists of three standard deposit gauges for the measurement of soot, dust and grit, etc., whilst three lead peroxide instruments measure the amounts of active sulphur dioxide present in the atmosphere these results are transmitted to the Department of Scientific and Industrial Research.

Tables showing the results of the investigations during the last six years are given on pages 42 - 47.

PROPOSALS SUBMITTED AND APPROVED BY THE MINISTRY OF HOUSING AND LOCAL GOVERNMENT FOR DEALING WITH SLUMS.

PART 1

- (I) Estimated number of houses unfit for human habitation within the meaning of Section 9 of the Housing Repairs and Rents Act, 1954, and suitable for action under Section 11 or Section 25 of the Housing Act, 1936 970
- (II) Period in years which the Council think necessary for securing the demolition of all the houses in (I) 10 years

PART 2

- (III) Number of houses in (I) in clearance areas and already covered by operative clearance or compulsory purchase orders or owned by the local authority -
- (IV) Number of houses which are already in clearance areas and for which clearance or compulsory purchase orders have been submitted to the Minister but have not yet become operative 5

PART 3

- (V) Number of houses which are already in clearance areas and for which clearance or compulsory purchase orders are to be made or which are to be purchased by agreement within the five years -
- (VI) Number of houses which are to be included in clearance areas still to be declared and which within the five years will be owned by the Local Authority or will have been included in a Clearance order or a compulsory purchase order submitted to the Minister 376
- (VII) Number of houses under (III), (IV), (V) and (VI) to be patched (if necessary) and retained within the five years under Section 2 of the Housing Repairs and Rents Act, 1954 for temporary accommodation -
- (VIII) Number of houses under (III), (IV), (V) and (VI) to be demolished in the five years 381
- (IX) Number of houses (including those already comprised in operative demolition orders) to be demolished in the five years as a result of action under Section 11 of the Housing Act, 1936 53

GENERAL REMARKS

Housing activities during the year have been as follows:-

Building of 122 houses and 12 flats by the Corporation and 30 houses by other bodies or persons.

CLEARANCE AREA.

The properties dealt with are as follows:-

Area	Number comprising the Area	No. of houses	No. of persons displaced.
Alma Street	2, 4, 6, 8 & 10 Alma Street	5	21

INDIVIDUAL HOUSES

With regard to three houses reported on in 1954 as dealt with under Section 11 of the Housing Act, 1936. Appeals were put in by the owners against the Orders made by the Council to demolish. At the County hearing the appeals were upheld by the Judge, subsequently Orders were again made but for closure only, the Council agreeing to the use of the premises for business purposes.

The following table shows the houses dealt with informally during the year:-

Address	Number of Houses	Persons to be Displaced.
57 Wigan Road	1	3
59 Wigan Road	1	3
1 Byrom Street	1	2
3 Byrom Street	1	5
5 Byrom Street	1	2
52 Lord Street	1	2
54 Lord Street	1	3
56 Lord Street	1	2
58 Lord Street	1	1
60 Lord Street	1	2
62 Lord Street	1	2
13 Vernon Street	1	2
15 Vernon Street	1	4
TOTALS	<u>13</u>	<u>33</u>

LANCASHIRE COUNTY COUNCIL (GENERAL POWERS) ACT, 1951

HAWKERS.

Any person, who shall by himself, or any person employed by him, sell or offer or expose for sale, any meat or meat food product, or fish, fruit or vegetables from any cart, barrow or other vehicle or from any basket, pall, tray or other receptable, must be registered.

The number of persons on the register at the end of the year was 71.

PREMISES.

All premises used or proposed to be used for storage of meat, meat food products, or fish, fruit, or vegetables must be registered.

The number of premises registered at the end of the year was 53.

FOOD AND DRUGS ACT, 1955 (Section 16)

ICE CREAM.

Under the above Act no premises, unless registered for that purpose, by the Council, shall be used for the sale or the manufacture for the purposes of sale of any commodity consisting of Ice Cream, or any substance similar thereto, or the storage of any such commodity intended for sale

At the end of the year 149 premises had been registered for the sale or manufacture of Ice Cream.

PRESERVED FOODS, etc.,

Under the above Act all premises used for the preparation or manufacture of sausages or potted, pressed, pickled or preserved meat, fish or other food intended for sale must be registered.

The number of premises registered at the end of the year was 100.

RODENT CONTROL

During the year as a result of complaints and continuous survey 1515 premises were inspected. As a result 316 infestations were found and in course of treatment 3,131 visits were made by the Rodent Operator.

A free service for the destruction of Rats and Mice is given to occupiers of dwelling-houses conditional on there being no contributory negligence. In all other cases the full cost of the work and materials is borne by the occupiers of the premises and in this connection the sum of £82. 17s. 8d. was recovered during the year.

SEWER INFESTATION

The Ministry of Agriculture, Fisheries & Food procedure as to the methods of pre-baiting and poisoning is adhered to throughout this work. The disinfestation of sewers comprises what is known as an initial treatment followed by maintenance of a similar kind at six-monthly intervals.

Two further maintenance treatments of sewers were undertaken and a comparative table of all treatments undertaken since the inception of this scheme in 1945 to date is given below:-

SEWER TREATMENT - RATS

Year	Treatment No.	No. of Man-holes treated	Pre-baiting (2 days)		Poison Baiting		Not Taken	Estimated Kill
			Taken	Not Taken	Good	Small		
1945	1	834	107	727	68	38	728	1160
